

Case Study Analysis Guide Questions (Pair Work)

1. Apply the scenario described in the case to your own field by citing a specific similar situation.

-not buying license/company/individual

Torrents Inq

As programmers and developers, we are expected to be skilled and professional with all our works. As much as possible, we create something big with a little to work with. We must use

An example of this case is when an IT company, or any individual that creates and designs programs and applications use pirated software and other tools in their development. It is a big no to develop with the use of unlicensed software, it is illegal yet it still happens because there are no strict implementations regarding the usage of these.

The given scenario sets an example of something good that turns into bad.

The scenario shows the illegal and abuse of use chorva ng power. Tapos sa it ganito rin tapos walang nangyayari kasi maraming walang pake. Walang alam sa IT Law ganern at di pa strictly implemented kaya walang pake sa copyrights and stealing of shits.

2. How difficult is it to abide by ethical standards given the cultural factors that we have in this country? Explain briefly.

Bat ka naman kase magpapakahirap kung binibigay namn sayo... JOKE KASE NASA NET
NAMAN NA LAHAT BAT PA BAYAD LOLS.

It is very difficult to abide since there are no threats and risks to your own life. Tas sa sobrang daming gumawa tama na sya sa mata ng tao, tao lang di law ha.

The main reason of this problem is that the internet provides everything that we need

3. How will you as a young professional adhere to the ethical standards given your inexperience, career plans and work/social affiliations that you wish to maintain?

Matakot sa law. And kaht sino pang pwedeng kumaso sayo, sundin yung ethical stndards kasi baa ikasira pa yon. Yng achievement mo through cheating is maawawala kasi di ka makikita as professional.

4. In a meme or infographic, express your positive resolve to adhere to ethical standards mentioned in this case study.
